REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The process to produce aqueous hydrocarbon fuel comprising emulsifying components comprising (A) a liquid hydrocarbon fuel, (B) at least one emulsifier, (C) a reactant emulsion comprising a water in oil emulsion of a liquid hydrocarbon and at least one emulsifier, and (D) a water mixture, was not found to be anticipated by or obvious over the prior art references of record. The closest prior art references appear to be Langer et al (6,530,964), Thompson et al (6,419,714), Langer et al (6,383,237), and Langer et al (6,368,366) which also disclose and claim processes to produce aqueous hydrocarbon fuel emulsions having the same or similar components resulting in a discontinuous aqueous phase being composed of aqueous droplets having a mean diameter of 1.0 micron or less. However, the instant process includes an additional reactant, reactant (C), which is a reactant emulsion comprising a water in oil emulsion of a liquid hydrocarbon and at least one emulsifier, which is not taught or suggested in the prior art references. All of the instant claims are drawn to the process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
